Suggestions for next meeting

15 responses

It was almost perfect, loved it so i dont even have anything in my head that could be better
better meat

Food variations

warm food

It is advisable that we did more practical activities in order to put in more effort and to demand more devotion.

I don't know.

Less is more - smaller sizes of higher quality meat would have been great.

More diverse food, more exciting things to do, flexible plan

Same vibe

more free time please

More free time so we can get to know each other better, I think that is better than working on something that we consider boring

More freetime and less activities im general... We had some to none freetime and the days were too busy with trips. All in all was a great expiriance but theres always room to improve if the feesback is listened to.

warm food and vegetarian options

more diverse food, more exciting things to do, less strictly planned out days make it more flexible

More input about the climate crisis

Which country are you from?
